4 Primary Healthcare Budget Performance

4.A Overview

In the first quarter of 2025, Edo State's Primary Healthcare (PHC) sector recorded a total expenditure of ₦2.24 billion against an original budget of ₦16.96 billion, translating to a performance rate of 13.2%. Analysis of the first quarter spending by economic classification reveals that recurrent spending, comprising personnel and overhead costs, dominated the disbursement during the period, while capital expenditure lagged considerably.

Specifically, ₦1.89 billion was spent on recurrent expenditures, achieving a 20.7% execution rate with personnel cost having the highest actual expenditure as expected. In contrast, capital expenditure was significantly underperforming, with only ₦341.58 million spent out of the ₦7.82 billion allocated, representing just 4.4% execution.

The low performance of capital expenditure in Edo State's Primary Healthcare sub-sector during the first quarter of 2025 is largely attributable to the inherent rigor and timelines associated with the public procurement process. Given that the first quarter is typically dominated by preparatory activities, such as finalizing procurement documentation, advertising bids, and selecting contractors; it is common for actual disbursements on capital projects to be low at this early stage of the fiscal year. Plans are being made to support the state government in placing greater premium on primary healthcare expenditure and to drive improved capital performance going forward, ensuring that budgeted resources are effectively translated into tangible service delivery outcomes.

A summary of the performance Year to Date (YTD) against the original budget is provided below for the main economic classifications of expenditure, and YTD against the programme segment (Objective level).
